

**Congratulations to Our Dear Friend,  
Long-Time EMA Corporate Board  
Member, LAcarGuy's Mike Sullivan for  
Receiving Grades of Green Honor**

Mike has been keeping our EMA family in cars for over 15 years. Green cars that is. Mike is the owner of LAcarGUY family of dealerships, which is a group of 9 award-winning dealerships and a state-of-the-art body shop that includes EMA's favorite Toyota and Lexus dealerships that literally sell more alternative fuel vehicles than anywhere in the country. The reason is that it's where his heart is. Mike's passion for

the environment and sustainability spreads through everything he does. He takes pride in offering the newest and greenest technology in transportation whether it's electric, hybrid or hydrogen fuel cell.

LAcAR GUY is active in local environmental programs and initiatives. To encourage adoption of electric vehicles, LAcAR GUY recently became the first automotive dealer in the country to offer electric charging stations at its dealerships that are open to the general public. What other car dealer has an “in-house environmental director!?”

In other words, Mike doesn't just talk the talk, he walks the walk - or, in this case, drives the drive. Mike is an inspiration to both the business world and the environmental world, proving you can be successful in business AND kind to the planet. Congrats, Mike, on a much-deserved honor.
