Green Jobs Fairs

A green jobs fair is an event that anyone can attend, where employers and schools give out information on green jobs to potential employees. Even as a high school student, this can be an incredibly valuable resource to use, as students are able to directly ask questions about different types of green jobs to those already in the field, and see what types of careers interest them.

The following is a list of upcoming Green Job Fairs in the LA area to check out!

- 1. January 31, 2023:** [Winter 2023 Civil and Environmental Engineering Career Fair](#)
- 2. TBD.** Check back on this page with updated green jobs fairs in 2023!
